

VELOCITY NEON — Asset Additions Report

New characters, models & visual effects added on 20 May 2026

On 20 May 2026 the project gained a large library of CC0 / open-licence art across three commits (**VFX overhaul**, **Add CC0 open-source game assets**, and **asset cleanup**). This report catalogues what arrived. Note: most of these are a **staged library** — the live game still renders the original seven skeleton/knight models and its original particle set, so the items below are available to wire in (see the companion sourcing & integration guide).

Summary

Category	Added	Status in game
3D models - total	79 GLB	Library (not yet wired)
Characters & creatures	9	Library
Environment	16	Library
Props	21	Library
Pickups	15	Library
Sci-fi structures	10	Library
Weapons (blasters)	8	Library
VFX particle textures	7 PNG	Library (some in use)
UI game icons	255 PNG	Library
UI emote icons	30 PNG	Library
Sci-fi HUD kit	~120 PNG	Library
Fonts	18 TTF	In use

Characters & creatures (9)

Low-poly characters that could serve as alternative player skins or new enemy types: **ghost**, **vampire**, **zombie**, **skeleton** and **keeper** (grim-reaper style), plus four **figurine** base meshes (standard, large, cube, detailed-cube) useful as proto/placeholder units.

Files: character-ghost, character-keeper, character-skeleton, character-vampire, character-zombie, figurine-cube-detailed, figurine-cube, figurine-large, figurine

Environment (16)

Dungeon / graveyard set-dressing - pillars, columns, coffins, candles, crystals, rocks, dirt patches, trees and a pumpkin. Ideal for breaking up the empty arena floor and adding biome flavour.

Files: border-pillar, candle-multiple, candle, coffin-old, coffin, column-large, cross-column, detail-crystal-large, detail-crystal, detail-dirt-large, detail-dirt, detail-rocks-large, detail-rocks, detail-tree-large, detail-tree, pumpkin

Props (21)

Dungeon and prototype props - barrels, crates, chests, banners, columns, coins, grenades, rocks and a trap. Good for destructible cover or arena clutter.

Files: banner_dungeon, barrel_dungeon, chest_dungeon, coin_dungeon, coin_proto, column-low_proto, column-rounded-low_proto, column-rounded_proto, column_dungeon, column_proto, crate-color_proto, crate-small, crate_proto, grenade-a, grenade-b, rocks_dungeon, stones_dungeon, target-detail, target-large, target-small, trap_dungeon

Pickups (15)

Collectible meshes - coins (bronze/silver/gold), gems/crystals, a heart, key, star, mushrooms, flag and crate-item. Several map directly onto existing systems (heart -> health drop, crystal/star -> XP orb).

Files: barrel_platformer, coin-bronze, coin-gold, coin-silver, crate-item, crate_platformer, detail-crystal-large, detail-crystal, flag_platformer, heart, key, mushrooms, star, star_platformer, tile-crystal

Sci-fi structures (10)

Modular sci-fi corridor/room/gate pieces and cables - useful for a future 'Neural Core' biome theme.

Files: cables, corridor-corner, corridor-end, corridor, gate-door-window, gate-door, gate-lasers, gate, room-small-variation, room-small

Weapons (8)

Eight blaster models (blaster-a ... blaster-h) that could be parented to the player to show the current weapon.

Files: blaster-a, blaster-b, blaster-c, blaster-d, blaster-e, blaster-f, blaster-g, blaster-h

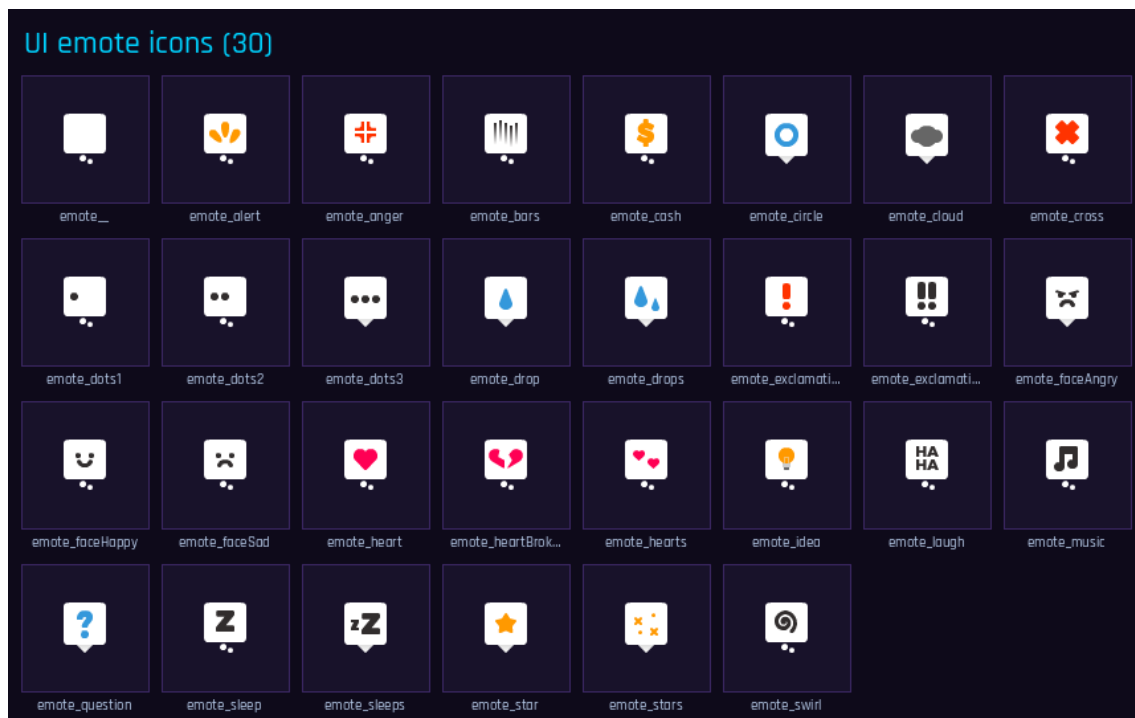

Visual effects — particle textures (7)

Seven new soft-particle textures joined the VFX set, pairing with the day's shader / GPU-particle overhaul (expanding shockwave rings, spark bursts). **glow_soft** and **ring_thin** suit unit glow and impact rings; **spark_diamond** / **starburst_6** / **streak_energy** suit hit and muzzle effects; **hex_grid** and **cloud_noise** suit ground / atmosphere shaders.

New particle textures (shown on a dark background for visibility)

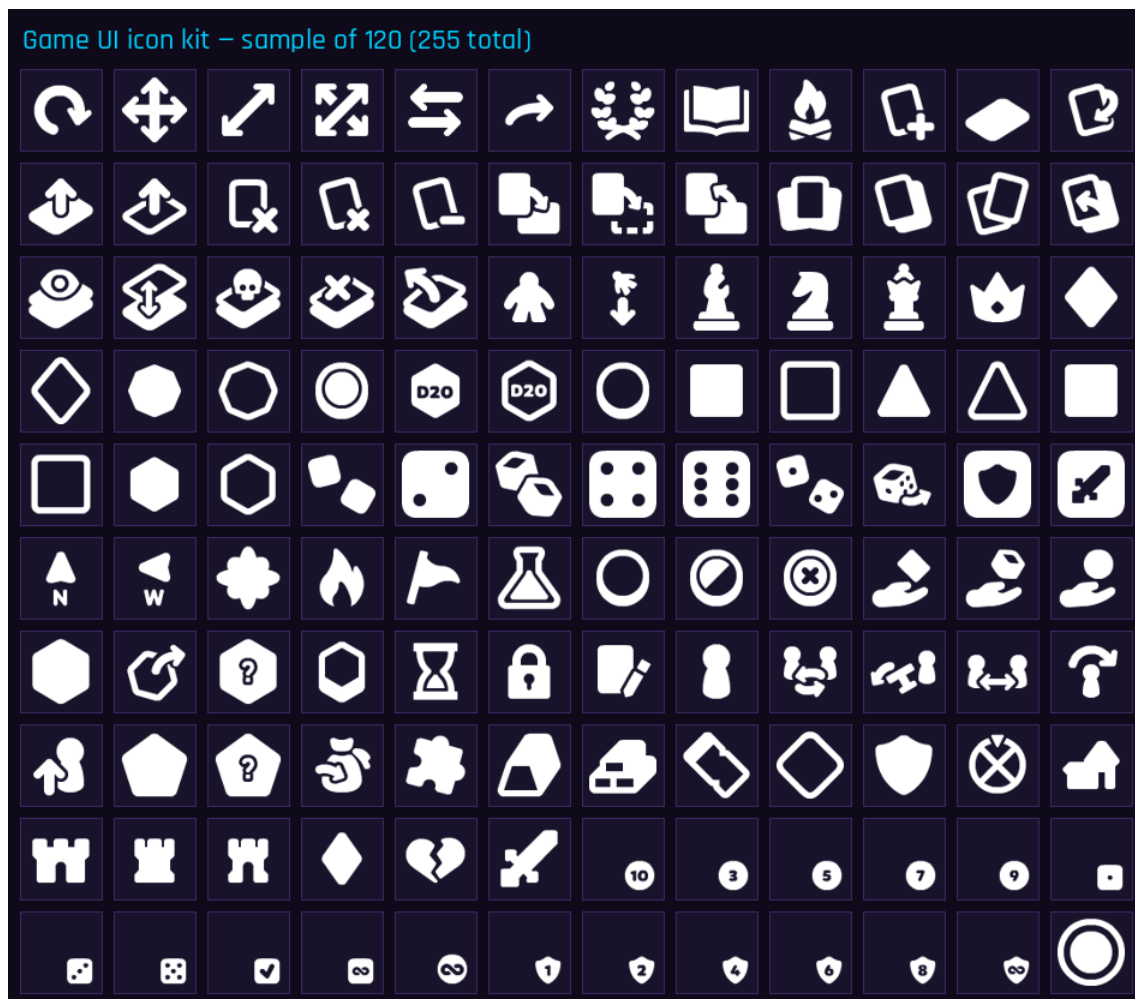

UI kit — emotes (30)

Speech / status emote icons - alerts, hearts, ideas, sleep, music, faces, etc.

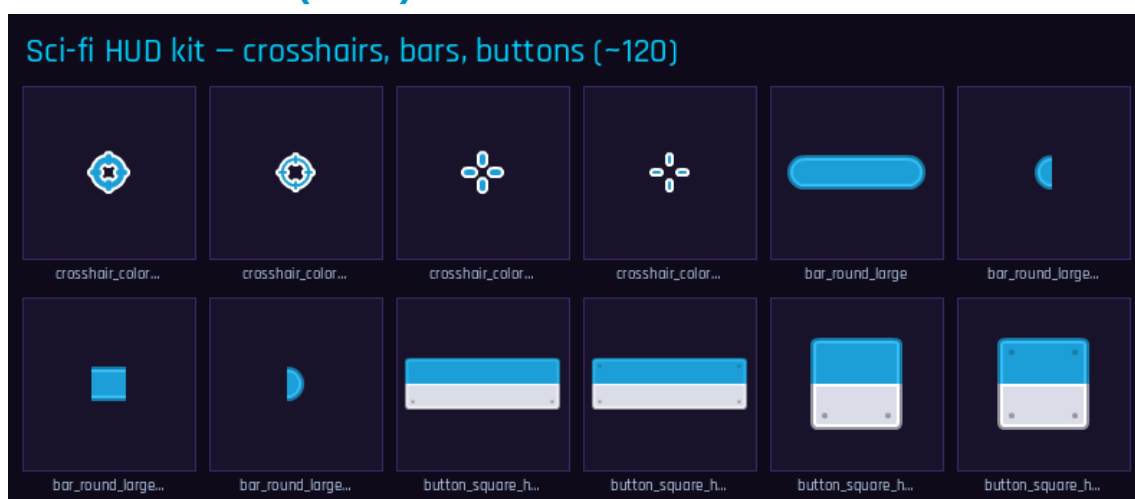

UI kit — game icons (255)

A large board-game / RPG icon set: dice (d2-d20), cards, chess pieces, suits, swords, shields, skulls, crowns, flasks, resources, structures and directional arrows - useful for upgrade-card icons, HUD badges and menus.

Representative sample of 120 of the 255 icons

UI kit — sci-fi HUD (~120)

Neon HUD kit: crosshairs, progress bars and header buttons (Blue theme, Default + Double variants)

Fonts (18)

Display & UI typefaces now available: **Orbitron**, **Exo 2**, the **Rajdhani** family (Regular/Medium/Bold), **kenney-icon-font**, and the 12-weight **Kenney** font family (Blocks, Future, Future Narrow, High, High Square,

Mini, Mini Square, Pixel, Rocket, etc.).

Notes & licensing

All additions are CC0 / open-licence game art (see **ATTRIBUTION.md** and **assets/CREDITS.md** in the repo). The 79 models, full icon set and sci-fi HUD are currently a staged library rather than active in-game content. The companion document **Velocity_Neon_Asset_Sourcing_Guide** covers how to wire the most useful of these in, plus more free sources to expand each category.
